

Portfolio Project: Part 2

The deliverables for Week 8 are:

1. A working navigation bar that works across all pages for your website.
2. All HTML pages created, with working navigation and basic structure (<div> tags in place for header, content, footer, etc.) for each page already in place.
3. A reference to an external CSS stylesheet in all pages, linking to an **external.css** page.
4. All digital assets for your portfolio site placed in a folder called **src**
5. Folder organization and file structure for your website. Keep your HTML pages, site graphics, and content graphics organized.

I will check the following:

1. Working navigation bar that links to all pages.
2. Basic structure present within all HTML pages.
3. External CSS references in each page, along with an external.css file.
4. Well organized hierarchy of HTML files and images.
5. A **minimum** of 20 digital assets from your portfolio that showcases your strengths as a creative professional.

Total Possible Points: 80.

Grading Rubric on next page:

	Excellent (4)	Good (3)	Average (2)	Poor
Navigation 20 points	Navigation bar is consistent, readable, attractive , and functional across all pages throughout the website.	Navigation bar is consistent, readable and functional across all pages throughout the website.	Navigation bar suffers from readability issues and/or not all pages are linked / broken navigation among a few pages.	Navigation bar difficult to read and/or links from nav bar do not work.
Structure 20 points	Site has solid template structure for header, footer, and content elements. Code is neatly formatted for readability. Includes link across all pages to external CSS file.	Site has solid template structure for header, footer, and content elements. Code could be better organized for readability. Includes link across all pages to external CSS file.	Site missing a few structural elements - code difficult to read or follow - errors in using tags. Missing CSS reference on one or more pages.	Code has no structure to speak of. No external CSS reference included.
Technical Specs followed 20 points	Folders, HTML files and images are neatly organized and properly named (lowercase, no spaces)	Folders, HTML files and images are organized and properly named (lowercase, no spaces). Minor issues with site hierarchy	Folders, HTML files, and images have major organizational issues. File naming convention does not adhere to proper HTML guidelines.	Didn't follow the technical specifications at all.
Digital Assets 20 points	More than 20 digital assets shown. Images are at a consistent size and ready for placement into site.	More than 20 digital assets shown. Images vary in size.	Less than 20 digital assets shown.	Less than 10 digital assets shown.
